

# World's Best Suites

## The New York Palace

PERFECTLY POSITIONED ON THE CORNER OF 50TH AND MADISON, THE NEW YORK PALACE ([newyorkpalace.com](http://newyorkpalace.com)), offers visitors luxurious accommodations in the heart of Midtown. The hotel gracefully blends the landmark Villard Mansion and world-renowned courtyard with a contemporary 55-story tower. With 909 rooms and suites, The Palace is known for unparalleled splendor, spectacular views, and exquisite service.

In 2014, The New York Palace completed the last phase of a \$140-million redesign, which introduced four new bars and lounges, a French market café, and a complete redesign of all guestrooms and suites, including The Towers, a hotel-within-a-hotel. Recently named one of the Top 25 Luxury Hotels in the U.S. by TripAdvisor, The Towers is a separate and distinct part of The New York Palace. With a private reception area, accessible from the main lobby, and a dedicated Les Clefs d'Or concierge team, express elevators transport Towers' guests to floors 41 and above, boasting spectacular skyline views.

*Clockwise from upper right: The Towers entrance; Jewel Suite Terrace; Jewel Suite dining area; Champagne Suite view at night*

In addition to spacious residential-style Towers Corner Suites, the renovation brought with it the unveiling of two 5,000-square-foot specialty triplex suites, including The Jewel Suite by Martin Katz and The Champagne Suite.

The magnificent Jewel Suite by Martin Katz – designed as a collaboration between renowned jeweler to the stars Martin Katz and HOK – offers lavish interiors, including diamond-like wall coverings in soothing jewel tones, a stunning 20-foot 'diamond waterfall' chandelier, and 'floating' crystal jewel boxes encasing haute couture jewelry creations by Martin Katz. The sprawling Grand Parlor is flooded with light from the suite's floor-to-ceiling windows, highlighting the grand piano sitting center stage. The Master Bedroom on the second floor boasts Art Deco-inspired chairs, sumptuously upholstered in lavish silver and pearl velvet, and a custom-designed Lucite tableau showcasing spectacular jewels. Guests will delight in the suite's third floor with its wood-burning fireplace, and can opt to take in the city views from the Jacuzzi spa installed on their private outdoor terrace.

Designed by notable New York-based design firm HOK, The Champagne Suite boasts a striking series of 18 foot high floor-to-ceiling windows that flood the Grand Parlor with beautiful natural light. The dining room offers hewn woods representing aged grape presses, which are offset by crystal fixtures and sleek wall finishes. The second floor creates an intricate color story of soft creams and smoky reds, and the decor of the Master Bedroom Suite showcases a palate of ecru, cream, and amber tones. The guest bedroom suite high-

lights glistening rose-tinted silvers that aerate warm copper and deep red accents. A classically inspired library with warm blacks and bronze color tones boasts carefully chosen books and art created specifically to evoke a historic but intimate setting. On the third floor, guests can indulge in the oversize outdoor terrace complete with a custom-designed Jacuzzi spa. The top floor is enabled to host sky-view receptions with a private bar, wood-burning fireplace, and an outdoor reception area.

Additional amenities for both suites include expert butler service, Maybach house car service, en-suite kitchens, and exquisite Molton Brown bath products.

No matter if their tastes are sleek and modern or classic and elegant, The New York Palace offers guests an unparalleled experience. ●
